

Jorge Garcia Serrano

Web developer

About me

I am a recent computer science graduate who is particularly interested in using its knowledge to create digital solutions, particularly on web and mobile.

I'm very passionate about technology. The thing I enjoy the most is learning and improving my skills in everything I do.

Education

Bachelor's Degree in Computer Sciences

- Universidad Autónoma de Baja California

Developing Front-End Apps with React

- On Coursera by IBM

Project Folder

Portfolio

Project portfolio and personal web page, responsive frontend project made with React and Tailwind CSS.

To do table creator

Web responsive app build with React with no backend (local storage user data) for tables and tasks management.

Recipes social platform

Web platform build with React as frontend and Node.js/MySQL as backend using login and register auth with the API.

API for recipe social platform

API to manage communication between database and frontend, CRUD actions, user token auth for route and session security.

Web platform for restaurant management

Platform for menu, employee management, warehouse management and environment, develop with HTML, Bootstrap, JS, jQuery, PHP and MySQL.
