

# Jorge Garcia Serrano

Web Developer

## About me

---

I am a recent computer science graduate who is particularly interested in using my knowledge to create and develop web and mobile solutions.

I'm very passionate about technology. The thing I enjoy the most is learning and improving my skills in everything I do.

## Education

---

**Universidad Autónoma de Baja California**

- Computer Science

## Project Folder

---

### Portfolio

Project portfolio and personal web page, responsive frontend project made with React and Tailwind CSS.

### Recipes social platform

Web platform build with React as frontend and Node.js/MySQL as backend using login and register auth with the API.

### API for recipe social platform

API to manage communication between database and frontend, applying CRUD actions, user token auth for route and session security.

### Web platform for restaurant management

Platform to edit restaurant menu, employee management, data by branch, warehouse management and environment values, develop with HTML, Bootstrap, JS, jQuery, PHP and MySQL.
